

# Real Estate Agent Tracker

Setup & User Guide · Realtors & brokers · commission, mileage & expense tracking · IRS Schedule C ready · Excel & Google Sheets

## What you bought

A single, formula-driven spreadsheet that does your real estate agent bookkeeping for you. Log each transaction once, and the workbook automatically organizes everything into a tax-ready **IRS Schedule C** summary and a live profit dashboard — per deal. No subscriptions, no logins, no monthly fees. It's yours forever.

## The 6 tabs

| Tab                       | What it's for                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------|
| <b>Start Here</b>         | A one-page overview and tips. Read this first.                                          |
| <b>Setup</b>              | Type your deal names (up to 5). Everything else links to them automatically.            |
| <b>Transactions</b>       | Your logbook. Add one row per income or expense. The only tab you touch daily.          |
| <b>Categories</b>         | Reference list of every category and its matching Schedule C line. Feeds the dropdowns. |
| <b>Schedule C Summary</b> | Fills itself in. Every expense mapped to the correct Schedule C line, per deal.         |
| <b>Dashboard</b>          | Live totals: net profit, income vs. expenses, by deal and by month.                     |

## Get started in 4 steps

- **1. Name your deals.** Open the **Setup** tab and type each deal name in column B (replace the sample names). You can have up to 5.
- **2. Delete the sample data.** The **Transactions** tab has 8 example rows so you can see how it works. Once you understand it, delete those rows (select rows 4–11, right-click, Delete) before adding your own.
- **3. Log a transaction.** On **Transactions**, fill one row: pick the Date, choose the Deal and Type (Income / Expense) from the dropdowns, pick a Category, enter the Amount. The Month column fills in by itself.
- **4. Read your reports.** Open **Schedule C Summary** and **Dashboard** any time — they update the instant you add a row. Nothing to refresh.

## How to log it the right way (important)

- **Log your GROSS commission as income** (*Commission income (gross)*) and your **brokerage split / desk fees as an expense** (*Broker split / desk fees*). Your net commission is what's left — and that's closer to what you're actually taxed on.

- **Track every business mile.** Mileage is one of the biggest deductions agents miss. Log car costs under *Car & truck / mileage*, or keep a mileage log and apply the IRS standard mileage rate — ask your tax pro which is better for you.
- **Tag deal-specific costs to the deal** (staging, photography, a closing gift) and general costs — marketing, MLS, association dues, CRM — to **(General / business)**.
- **Closing & client gifts are deductible but capped** by the IRS (commonly \$25 per recipient per year). Log them under *Client & closing gifts* and confirm the limit with your tax pro.

## Use it in Excel or Google Sheets

**Excel / Numbers:** just open the .xlsx file.

**Google Sheets:** go to Google Drive → New → File upload → select the .xlsx. Then open it and choose *File* → *Save as Google Sheets*. All formulas, dropdowns and reports carry over.

## Each tax year

Keep one file per year. At the start of a new year, make a copy and rename it (e.g. “Real Estate Agent Tracker 2027”), then clear the Transactions rows. Your prior year stays untouched for your records.
