

Cleaning Business Tracker

Setup & User Guide · House cleaners & cleaning companies · per-client profit + IRS Schedule C · works in Excel & Google Sheets

What you bought

A single, formula-driven spreadsheet that does your cleaning business bookkeeping for you. Log each transaction once, and the workbook automatically organizes everything into a tax-ready **IRS Schedule C** summary and a live profit dashboard — per client. No subscriptions, no logins, no monthly fees. It's yours forever.

The 6 tabs

Tab	What it's for
Start Here	A one-page overview and tips. Read this first.
Setup	Type your client names (up to 5). Everything else links to them automatically.
Transactions	Your logbook. Add one row per income or expense. The only tab you touch daily.
Categories	Reference list of every category and its matching Schedule C line. Feeds the dropdowns.
Schedule C Summary	Fills itself in. Every expense mapped to the correct Schedule C line, per client.
Dashboard	Live totals: net profit, income vs. expenses, by client and by month.

Get started in 4 steps

- **1. Name your clients.** Open the **Setup** tab and type each client name in column B (replace the sample names). You can have up to 5.
- **2. Delete the sample data.** The **Transactions** tab has 8 example rows so you can see how it works. Once you understand it, delete those rows (select rows 4–11, right-click, Delete) before adding your own.
- **3. Log a transaction.** On **Transactions**, fill one row: pick the Date, choose the Client and Type (Income / Expense) from the dropdowns, pick a Category, enter the Amount. The Month column fills in by itself.
- **4. Read your reports.** Open **Schedule C Summary** and **Dashboard** any time — they update the instant you add a row. Nothing to refresh.

How to log it the right way (important)

- **Log each cleaning payment as income** (*Cleaning income*) and tag it to that client on the Setup tab — the dashboard then shows profit per client.
- **Tips are taxable income.** Log them under *Tips received* so your books match what actually hits your account.

- **Track every business mile** between jobs — mileage is one of a cleaner's biggest deductions. Log car costs under *Car & truck / mileage* or keep a mileage log and apply the IRS rate (ask your tax pro).
- **Tag client-specific costs to the client**; put shared costs — supplies, insurance, marketing, software — under **(General / business)**.

Use it in Excel or Google Sheets

Excel / Numbers: just open the .xlsx file.

Google Sheets: go to Google Drive → New → File upload → select the .xlsx. Then open it and choose *File* → *Save as Google Sheets*. All formulas, dropdowns and reports carry over.

Each tax year

Keep one file per year. At the start of a new year, make a copy and rename it (e.g. "Cleaning Business Tracker 2027"), then clear the Transactions rows. Your prior year stays untouched for your records.

Disclaimer. This template is a bookkeeping organizer, not tax, legal, or accounting advice. The Schedule C line mapping is provided for convenience only. Tax rules vary by situation and jurisdiction — always confirm your specific filing with a qualified tax professional before submitting. Made with spreadsheet software; design and formulas by the seller.
