

Rideshare & Delivery Driver Tracker

Setup & User Guide · Uber · Lyft · DoorDash · Instacart · mileage + IRS Schedule C · works in Excel & Google Sheets

What you bought

A single, formula-driven spreadsheet that does your rideshare & delivery business bookkeeping for you. Log each transaction once, and the workbook automatically organizes everything into a tax-ready **IRS Schedule C** summary and a live profit dashboard — per platform. No subscriptions, no logins, no monthly fees. It's yours forever.

The 6 tabs

Tab	What it's for
Start Here	A one-page overview and tips. Read this first.
Setup	Type your platform names (up to 5). Everything else links to them automatically.
Transactions	Your logbook. Add one row per income or expense. The only tab you touch daily.
Categories	Reference list of every category and its matching Schedule C line. Feeds the dropdowns.
Schedule C Summary	Fills itself in. Every expense mapped to the correct Schedule C line, per platform.
Dashboard	Live totals: net profit, income vs. expenses, by platform and by month.

Get started in 4 steps

- **1. Name your platforms.** Open the **Setup** tab and type each platform name in column B (replace the sample names). You can have up to 5.
- **2. Delete the sample data.** The **Transactions** tab has 8 example rows so you can see how it works. Once you understand it, delete those rows (select rows 4–11, right-click, Delete) before adding your own.
- **3. Log a transaction.** On **Transactions**, fill one row: pick the Date, choose the Platform and Type (Income / Expense) from the dropdowns, pick a Category, enter the Amount. The Month column fills in by itself.
- **4. Read your reports.** Open **Schedule C Summary** and **Dashboard** any time — they update the instant you add a row. Nothing to refresh.

How to log it the right way (important)

- **Tag each payout to the platform you earned it on** (Uber, DoorDash, Lyft...) and put shared costs under **(All platforms / general)**. The dashboard then shows which app pays best.

- **Mileage is your biggest deduction.** Keep a mileage log (date, miles, purpose). Multiply total business miles by the IRS standard rate and enter that dollar amount under *Mileage deduction (miles × IRS rate)*.
- **Pick ONE car method.** Standard mileage (above) OR actual costs (gas, repairs, insurance) — not both. This sheet is built around the standard-mileage method most drivers use; ask your tax pro if actual costs would beat it for you.
- **Tolls, parking, phone, hot bags and supplies are deductible on top of mileage.** Log them in their own categories so nothing slips through.

Use it in Excel or Google Sheets

Excel / Numbers: just open the .xlsx file.

Google Sheets: go to Google Drive → New → File upload → select the .xlsx. Then open it and choose *File* → *Save as Google Sheets*. All formulas, dropdowns and reports carry over.

Each tax year

Keep one file per year. At the start of a new year, make a copy and rename it (e.g. “Rideshare & Delivery Driver Tracker 2027”), then clear the Transactions rows. Your prior year stays untouched for your records.

Disclaimer. This template is a bookkeeping organizer, not tax, legal, or accounting advice. The Schedule C line mapping is provided for convenience only. Tax rules vary by situation and jurisdiction — always confirm your specific filing with a qualified tax professional before submitting. Made with spreadsheet software; design and formulas by the seller.
